

# Parallel session: Experience Curves Methodology

Martin Junginger  
Utrecht University

REFLEX expert workshop “**Technological Learning in the Energy Sector**”  
Karlsruhe, 8 November 2017

# Experience Curves Methodology

---

- Three parallel sessions:
  - Model implementation
  - ECs and Environmental Impact
  - **Experience curves methodology**
- Aims of this session:
  - Discuss current/new general methodological issues related to the use of experience curves
  - Discuss specific issues encountered in the Reflex project
  - => Scoping session for relevant topics for new book on experience curves

# Agenda for this parallel session

---

## 13:30 **One vs Two-factor Experience Curves**

Noah Kittner (UC Berkeley)

## 14:00 **Markets, spillover and radical innovations**

Thomas Martinsen (NMBU)

14:30 Coffee break

14:45 Open discussion

- Issues raised by first 2 speakers

Possible other topics

- How to deal with price vs. production cost data (wind onshore/offshore)
- Functional unit: kW vs. kWh (wind onshore/offshore)
- Component curves (PV modules & BOS)

# Summary of main points

---
